

Steady-state O₂ diffusion–Monod model. $D_{\text{O}_2} = 2.68 \times 10^{-5}\ \text{cm}^2\ \text{s}^{-1}$ (Phalak et al. 2016), $\delta = 25\ \mu\text{m}$, $C_{\text{bulk}} = 0.28\ \text{mg}\ \text{L}^{-1}$, $\mu_{\text{max}} = 0.5\ \text{h}^{-1}$, $\rho = 10\ \text{g}\ \text{L}^{-1}$.
